- Technologies: MySQL, Postman, Git & GitHub, ASP.NET Core, Web Services & REST API, JSON, Visual Studio Code Visual Studio Community, Postman

## Projects

---

- **Beekeeping Assistant** [Github](#)

An Application designed with the beekeeper in mind. It is made for the user to keep track of hives and the inspections that are made per hive.

*Technologies used:* JavaScript, React.js, React-Bootstrap, React-Table, HTML, CSS, Python, Django, Django Rest Framework, MySQL, Youtube, Web Token API, Google-React Charts.

- Application features include

- User account registration, login, and logout (Authentication & JWT)

- Profile creation

- The ability to create, update, and view Hives.

- Hives have notifications if the user is delayed in updating the Hive inspection date using React.js alert notifications.

- The ability to create, update and view Inspections based on Hive using React and Django.

- Users have the ability to search inspections to narrow down which inspections match their query, using React-Table.js

- Users get a graph that shows data on that particular graph on overall Hive Health. using Google-React Chart.

- Ability to search the most common beekeeping questions and display Youtube videos related to that question using Youtube Web API.

## Education and Certifications

---

- **Full Stack Developer Certificate**, DevCodeCamp - Milwaukee, WI **2022**  
14-Week, project-based coding boot camp building real-world full-stack applications and deploying them to the cloud utilizing DevOps best practices.
- **Bachelor of Fine Arts in Illustration**, American Academy of Art - Chicago, IL. **2015**

## Work Experience

---

### Graphic Designer

Design team

### Commercial Signs

Smyrna, GA

June 2019–March 2022
